Master of Computer Application

1. Introduction : Information Technology today is recognised as a frontier area of knowledge and also a critical enabling tool for assimilating, processing and productivising all other spheres of knowledge. It is also recognised the world over that information technology is going to change every facet of human existence and will usher in knowledge based society. It is estimated that in India in the current plan period there will be a demand of over 35 lakh computer professionals and with the availability of present educational facilities, the short fall can be in the range of over 20 lakhs. Therefore there is a need to take up IT education programmes in a big way.

There are three basic skill levels for an IT professional. The first level is that of an operator, the second is of a programming assistant or a programmer and the third is of a system analyst or a manager. There are new skills required in the changing IT scenario in the world which include web designing, handling of internet based information and programming for the networked environment. The additional skills also include hardware maintenance, networking and marketing.

This course will equip the students with advanced knowledge in computer field. Such students are in good demand in the field, both in the organised and unorganised sector, industry and educational institutions.

Bachelor of Science in Medical Laboratory Technology

1. Introduction : With the increasing network of medical services in the country the demand for paramedical assistants and paramedical services has also gone up. The doctors, hospitals and nursing homes require a large number of technologically skilled people to assist them in various branches of their work.

Branches like pathology require pathology technician who can collect patient's samples and can help in processing these samples. Similarly surgeon's require Aneasthetist, Operation Theater Technician, Operation Theater Nurses, Ward Boy and other such paramedical assistants to provide various services to the patients.

Then there are branches of medical sciences like Radiology, Urology and others which require technicians for proper medical care. These technicians are required both in urban and rural areas.

Supportive skilled people like physiotherapist are required in Cardiothoracic surgery, Gyneacological Procedures, Orthopeadic surgery, Sport Physiotherapy etc. and these courses are also assuming great importance.

Thus paramedical branch is assuming great importance in today's world and job prospects in this area are increasing. A large number of students are also going to Middle East, European and Western countries also.
